BUYERS OPPORTUNITY SALE

It is safe to reason that we won't reach the peak in beef cattle prices for several years. Most reliable reports indicate that we are at the low point in total cattle numbers in the current cattle cycle. The cyclical peak in beef cattle prices usually occurs a couple of years after the low point in total cattle numbers. It would therefore appear that this is a good time for expansion of beef cattle herds without undue risk of severe price reaction.

If you have been looking for beef cattle, you know they are hard to find. Mid-Kansas Association members have built this into a twice-annual event that is recognized widely as one of the best places in America to buy quality registered Shorthorn bulls and females. They all have a future at stake in the success of these semi-annual events and that is why several of them have dug deep in their herds to once again assure a top quality offering.

We would like to call your attention also to the big Kansas Shorthorn Feeder Calf Sale that will be held here at Salina on the day before – October 15 – 1,000 head of Shorthorn steer and heifer calves will be auctioned. Plan to spend October 15 and 16 in Salina for outstanding commercial and registered Shorthorn values.
